Profile

Having near to 3 years of experience in building scalable Backoffice applications for retail POS systems using React and Next.js. Skilled in developing high-performance dashboards and reusable components and optimizing UI for better user experience.

Skills

- | | | | |
|---------------------|----------------|---------------|------------------------|
| • React.js | • HTML5 | • Context API | • GitHub |
| • Next.js | • CSS3 | • MUI | • GitLab |
| • JavaScript (ES6+) | • Tailwind CSS | • Untitled UI | • Antigravity |
| • TypeScript | • Redux | • Git | • REST API Integration |

Work Experience

Revest Solutions

June 2024 to Present

Frontend Developer

Job Responsibilities

- Developed scalable retail POS Backoffice applications.
- Integrated REST APIs with optimized data flow.
- Collaborated with backend, mobile, and QA teams effectively.
- Supported production deployments and post-release fixes.

Key Contributions

- Built interactive sales dashboards handling **large datasets**, enabling real-time data visualization for business insights.
- Implemented efficient state management using Redux and Context API to handle **complex multi-module data flows across 4+ features**.
- Improved application performance by optimizing rendering and implementing lazy loading, reducing page load time by **20–30%**.
- Developed modules for **sales, transactions, user management, and store operations**.
- Implemented **filters, searches, and pagination** for handling large datasets.

Personal Projects

Innowave Project

- Developed a comprehensive engineering project learning and exploration platform with responsive UI and scalable front-end architecture.
- Designed dynamic multi-category filtering based on academic levels (Mini/Major) and domains including IT, CSE, ECE, and EEE for streamlined project discovery.
- Built custom workflows, dynamic project cards, and mentorship booking integration.

Sprint Flow

- Developed an interactive operations dashboard and sprint delivery command center with responsive and scalable frontend architecture.
- Built a dynamic Kanban-based sprint management board featuring multi-column task tracking, real-time status updates, and sprint workflow monitoring.
- Implemented real-time productivity metrics, reactive task creation workflows, and JWT-ready workspace authentication for secure team collaboration.

Rebsort

- Developed a premium digital marketing agency landing page focused on lead generation, responsive design, and conversion-driven user experience.
- Built dynamic full-funnel growth strategy sections, interactive multi-step process flows, and client testimonial components to improve user engagement.
- Implemented responsive pricing tiers and secure checkout workflows optimized to convert first-time visitors into potential business leads.

Education

Bachelor of Information Technology

Osmania University, Hyderabad, 2022

Diploma in Electrical and Electronics Engineering

Govt polytechnic Kotagiri, Nizamabad, 2019
